

ALPHAacoustic-Multi
MULTI-PATTERN ACOUSTIC PANELS

APPLICATIONS

ALPHAcoustic-Multi is a multi-pattern, fabric wrapped sound absorptive panel with innovative form. It offers high installation flexibility, with multi combination patterns, according to aesthetics needs. These panels with their irregular shape offer an absolute creative and expressive freedom. They offer reduction of the disturbing noise reflections, improving the interior acoustics, reducing the reverberated noise.

It can be installed on:

- Walls
- Ceilings

Possible applications:

- Reception areas
- Offices
- Restaurants
- Recording studios
- Discos
- Waiting rooms
- Classrooms
- Teleconferance Rooms
- Call Centers

SOUND ABSORPTION

ALPHAcoustic-Multi is specifically designed to achieve maximum sound absorption at a specific acoustic range band. Our team of acoustic engineers can assist in choosing the acoustic baffle with the most adequate sound absorption index (α_s) for your project according to ISO 354.2003 and ISO 11654.1997.

Indicative practical sound absorption coefficient (α_p), and weighted sound absorption coefficient (α_w) can be found in the following table:

ALPHAcoustic-Multi Type:	Practical Sound Absorption Coefficient α_p						Weighted Sound Absorption Coefficient (α_w)	Sound Absorption Class
	Frequency (Hz)							
	125	250	500	1000	2000	4000		
Thickness 30 mm	0.05	0.3	0.75	0.8	0.9	0.85	0.8	B
Thickness 50 mm	0.20	0.75	0.9	1	1	1	1	A
Thickness 80 mm	0.45	0.95	1	1	1	1	1	A

Depending on the requirements of each application and in order to achieve sound absorption in a wide range of frequencies, a combination of different sound absorptive materials can be applied.

INSTALLATION

Multi-pattern Acoustic Panels **ALPHA**coustic-Multi can be easily placed on the wall with their simple hanging system at the back of the panel, included in the installation pack. An alternative installation method is a neodymium Magnet system, that panels can be equipped with.

EXTERNAL COVERING

Acoustic panels **ALPHA**coustic-Multi are available with different external covering depending on the aesthetics of each project. The most common is a special sound transparent fabric with high endurance and excellent quality. They are available in various colours and can be self extinguished (*Flamability test EN13501-1 Class B, s2, d0*).

For more color options, please refer to our sound transparent fabric [ALPHA](#)coustic CL. Due to their increased sound transmissibility, the sound absorption capabilities of the internal material are not affected.

The acoustic panel **ALPHA**coustic-Multi can be produced in different dimensions and thickness upon request.

ALPHA ACOUSTIKI Ltd combines technical experience and scientific knowledge of its Engineers which are specialized in the field of room acoustics since 1980. Our complete range of innovative acoustics products can offer solutions to complex architectural acoustic projects. Some of our Acoustics product creations:

- **ALPHA**acoustic-AB: Acoustic vertical Baffles
- **ALPHA**acoustic-AM: Self-standing Acoustic Panels
- **ALPHA**acoustic-AP.C: Acoustic Panels with fabric
- **ALPHA**acoustic-Desk: Desk Acoustic Partition
- **ALPHA**acoustic-Kiklos: Round Acoustic Panels
- **ALPHA**acoustic-Kima: Wave Acoustical Ceiling Cloud
- **ALPHA**acoustic-Puzl: Modular Acoustic Panels

and many more

Our technical department (tech@alphacoustic.com), will be glad in assisting you the best solution to improve the Architectural Acoustics in your project.
